Subject: FMC Operable Unit (EMC Site) Independent Review -- Basic Background Information for Facilitator

Patty,

I understand that Argonne National Laboratory has contracted with your firm to provide meeting facilitation services to assist EPA headquarters and the Shoshone-Bannock Tribes with updating EPA's draft project plan and Interagency Agreement (IAG) work order for the excavation/treatment technologies independent review that Argonne will perform. We intend to convene an "introductions and meeting planning" conference call with EPA headquarters staff, representatives of the Tribes, and you on Thursday, 5/15. Our call objective will be to provide you with sufficient information and perspectives so that you can prepare for facilitating our in-person meeting with EPA headquarters and the Tribes' representatives during the week of 6/9 in Salt Lake City.

In the meantime, I've attached three documents to provide some background information on the Independent Review and its current status.

1. July 2012 letter from EPA Deputy Administrator Bob Perciasepe to Shoshone-Bannock Tribal Business Council Chairman Nathan Small.
2. Attachment to July 2012 Perciasepe letter entitled "EPA'S Draft Proposal to Commission an Independent Review of Excavation/Treatment Technologies for the FMC Operable Unit of the Eastern Michaud Superfund Site".
3. EPA's March 7, 2014 Draft Project Plan (includes draft IAG Work Order) entitled "Preliminary Project Plan for Independent Review of Elemental Phosphorus Remediation; Phase 1: Technology Review".

I will add you to the calendar invitation for the 5/15 call; you should receive a separate email invitation shortly. As EPA intends to exercise as much transparency and communication as possible with the Tribes' representatives during this independent review, please do not hesitate to include them (Mr. Kelly Wright, Ms. Susan Hanson, Ms. Jill Grant, Esq., and Mr. David Reisman) on email communications with EPA.

Finally, I understand that Mike Adam of my office will convene a contract administration-focused call with Mr. Lou Martino of

Argonne National Laboratory and you on Tuesday, 5/13. Given the nature of the call, other EPA staff and the Tribes' representatives will not participate. If you have any questions, please let Lou know.

If you have any questions, please don't hesitate to let me know.

Best,

Greg
